JENNY LEANA FOTSO NGOMPE

(917) 402-6976 | jf3433@columbia.edu | https://www.linkedin.com/in/jennyleanafotsongompe/ | https://github.com/LeanaNgompe

EDUCATION

Columbia University New York,NY
Masters of Science in Computer Science Expected May 2026
Relevant course work: User Interface Design, Innovation and Design Lab, Operating System, Intro to Databases, Engineering Software as a Service

Columbia University: Barnard College New York, NY
Bachelor of Arts in Computer Science and Women's Gender and Sexuality Studies May 2025
Relevant course work: Artificial Intelligence, Machine Learning, Natural Language Processing, Deep Learning in Computer Vision

SKILLS

Programming Languages: C/C++ , Python, Java, HTML, CSS, Javaquery, Ruby on Rails
Frameworks: Keras, PyTorch, TensorFlow, OpenCV, Scikit-learn
Other Tools: Github, VSCode

EXPERIENCE

Barnard College New York, NY
Research Assistant Sep 2024 - May 2025
- Conducted in-depth literature review, identifying 7 key strategies to creating gender inclusive web applications
- Collaborated with Barnard student and faculty to design visual studio code extension using JavaScript to enhance gender inclusivity in account creation flows pipeline
- Tested extension and accompanied website on 10 real world examples of account creation resulting in visual studio code extension and gender inclusive toolkit

Axle Informatics Rockville, MD
AI Fellow Aug 2024 - Dec 2024
- Developed a large language model, enabling streamlined production of 785 CWL files and an efficient bioinformatics pipeline
- Utilized flan-t5 model to augment existing descriptions for CWL files increasing dataset from 4710 datapoint to 9420, leading to an increase of rouge1 score by 10%
- Coordinated bi-weekly team meetings and task list to ensure work distribution and task delegation leading to successful completion of final presentation

Cybastion Arlington,VA
Cybersecurity Intern Jun 2024 - Jul 2024
- Led implementation of streamlined configuration protocols for a passive Security Operations Center (SOC), ensuring 100% system functionality as verified by internal audits
- Designed and maintained a 2,400-row spreadsheet for 10 projects over 30 weeks, streamlining resource tracking with automation and data visualization

ACADEMIC PROJECTS

Fashion Forecast
- Collaborated in creating dissimilar set by randomly swapping an items from existing similar data samples resulting in 10,000 samples in total
- Fine-tuned hugging face Clip model to generate matching outfits achieving a training AUC-ROC score of 0.754

Skin Condition Classification
- Constructed an automated data generator to enhance skin types and skin conditions distribution in dataset expanding diversity of skin types by 15%
- Accompanied in optimization of ResNet18 model on current dataset achieving a validation accuracy of 73.08% and an overall test accuracy of 73.96%

LEADERSHIP AND ACTIVITIES

African Development Group New York, NY
Vice President May 2024 - May 2025
- Led cross-functional team of 9 members to initiating biweekly conversations surrounding African social, political and economic climate within budget fostering a community of critical thinkers and problem solvers
- Spearheaded the organization and execution of first ever ADG conference where 30+ participants workshopped innovative solutions to African political , social and economic issues
